MySQL Aggregate Functions

MySQL Aggregate Functions

- Aggregate Functions perform a calculation on a set of values and return a single value.
- NULL values are generally ignored.
- **COUNT** - Returns a count of values.
- **AVG** - returns the average of the set of values given.
- **SUM** - returns the sum of the set of values given.
- **MAX** - Returns the maximum value of the set of values given.
- **MIN** - Returns the minimum value of the set of values given.
